Explanation for ordering spare parts

Depictions should rather be seen symbolically and not as binding.

We reserve the right to eventually make changes.

Designations:

1. Left
2. Right
3. Frontside
4. Backside

have to be understood in the sense of the driving direction.

Diverted spare parts are only available as part of the repair kit.

Components depending on the height, e.g. corner stanchions or middle profiles, can only be ordered with the applicable production order number.
